

### What is Barbering?

Barbering is the practice of shaving or trimming the beard, cutting the hair, and giving facial and scalp massages with oils, creams, lotions, or other preparations, either by hand or using mechanical appliances. Barbers are also trained in singeing, shampooing, arranging, dressing, cutting, waving, chemical waving, hair relaxing, or dyeing the hair or applying hair tonics and in applying cosmetic preparations, antiseptics, powders, oils, clays, or lotion to the scalp, face, or neck.

### How is a Barber Different from a Cosmetologist?

Cosmetologists as well as barbers may perform most common services, listed above. However, some services, such as shaving, can only be performed by barbers.
